DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a plasma confining assembly, classified in class 118, subclass 723E.
- II. Claims 14-21, drawn to a plasma apparatus, classified in class 118, subclass 723R.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus does not require a confining assembly in which the first confining element is spaced apart from the second confining element and/or a confining assembly wherein the first and the second confining elements are positioned proximate the periphery of the process region. The subcombination has separate utility in other plasma apparatuses, such as inductive or microwave plasma apparatuses.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the

search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Quin C. Hoellwarth on 02/22/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luz L. Alejandro whose telephone number is 703-305-4545. The examiner can normally be reached on Monday to Thursday from 7:30 to 6:00.
